## **DETAILED ACTION**

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The present invention is directed towards methods which display views of service levels in a utility computing environment and provide rebates in accordance with a service level agreements with a customer such that the customer only pays for service rendered within the computing environment. Independent claims 1, 10, 15, 21, and 24 each teach the novel feature of generating a first and second rebate, wherein generating the first rebate is in response to successfully completing a service request using less time than specified in the service level agreement based on a completion time and a promised completion time, wherein the completion time is an amount of time used to successfully complete the service request, wherein the promised completion time is an agreed upon amount of time to complete the service request specified in the service level agreement, and wherein the completion time is less than the promised completion time, and wherein the first and second rebate assure that the customer pays for service rendered.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The following reference has been identified as the most relevant prior art to the claimed invention(s). The prior art generally relates to providing rebates for breaching service level agreements. Mikurak (US 6671818) discloses a method and system for life cycle network asset management in a network based supply chain. Mikurak's method and system include establishing a service level agreement with a customer and subsequently monitoring service levels and providing warnings and rebates for breaches of the service level agreement based on the monitored service levels. Mikurak does not anticipate nor render obvious generating a first and second rebate, wherein generating the first rebate is in response to successfully completing a service request using less time than specified in the service level agreement based on a completion time and a promised completion time, wherein the completion time is an amount of time used to successfully complete the service request, wherein the promised completion time is an agreed upon amount of time to complete the service request specified in the service level agreement, and wherein the completion time is less than the promised completion time, and wherein the first and second rebate assure that the customer pays for service rendered.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

“UUNet to break new ground with blanket service-level agreements.” By Ian Scales (PTO-892 Reference U) discloses an Internet Service Provider introducing a comprehensive service level agreement (SLA), including rebates for SLA breaches, notably for down-time and latency breaches.
